

Contaminants, Communications & Water Quality Sampling

2-Day Series Training • July 23 & 24, 2024

Day 1: July 23, 2024 • 8:00 am–4:00 pm (PST)

PFAS contaminants are a growing concern. Learn their origins, health risks and treatment options as well as how the new EPA rule may affect your system. This course will discuss other current and emerging contaminants and concerns and provide information for small systems about protecting public health.

This course will also cover sampling plans, sample types and collection protocols as well as a discussion of common drinking water contaminants and testing results. It will also include a “hands-on” practice session for several types of samples.

Day 2: July 24, 2024 • 9:00 am–12:15 pm (PST)

Building trust and credibility with the community is an integral part of delivering on a utility’s mission of providing reliable drinking/wastewater services at a reasonable cost. Often overlooked is the fact that every employee and board member is an emissary for the utility. This training provides board members, staff and operators with an understanding of basic tools to plan for and deliver effective messages so utility personnel can convert opportunities to communicate into positive public interactions during good times and bad.

1.0 Washington Certification Services Drinking Water Continuing Education Units awarded for attending both days (pending)

Where: Quinault Beach Resort and Casino
78 WA-115 • Ocean Shores, WA 98569
